Overview 概覽

In recent years, wireless, telecommunication and smart products have been undergoing rapid development and have formed an important part of people's daily life. While these products may help leading us to a smarter way of living, their safety and performance are of paramount concern.

Testing and certification plays a vital role in ensuring the safety and quality of products. Through third party testing and certification services, manufacturers and traders could be assured that these products comply with international standards or regulations, thus enhancing product quality and consumer confidence, and establishing good reputation.

This seminar aims to introduce the latest trend and development in testing and certification on wireless and telecommunication products. Different parties including government department, trade and professional bodies, and testing and certification organisations are invited to share their insight on the needs, benefits and latest requirements for testing and certification of these products. Manufacturers, traders, suppliers, testing and certification practitioners or companies that have been using or wish to tap on the advantages of testing and certification services should not miss this opportunity.

近年，無線、通訊及智能產品發展迅速，已成為人們日常生活的重要部分。這些產品雖可為大家帶來優質智慧生活，但產品的安全及性能亦備受關注。

檢測認證就確保產品符合安全及質量要求方面擔當重要角色。透過第三方的檢測認證服務，生產商及貿易商可確定產品符合國際標準或法規，有效提升產品的品質和消費者信心，並建立良好信譽。

是次研討會旨在介紹無線及通訊產品在檢測認證方面的最新發展及動向。我們邀請了政府部門、商會及專業團體，以及檢測認證機構的代表，就無線及通訊產品檢測認證的需求、好處和最新要求，分享他們的見解。生產商、貿易商、供應商、檢測和認證業從業員、檢測認證服務的用家，以及有意善用檢測認證服務可帶來優勢之公司，都不容錯過此次研討會。
